NASMES 2019 – On-site Details

Conference Registration: Conference registration will be held in Kane Hall in the Walker Ames Room (#225) on the second floor. Registration opens on Thursday, June 27, at 8:00 AM and will be open each day at 8:00 AM until the close of sessions.

Program Schedule: Please check Conference Maker for up-to-date session information (specific room locations will be posted by Monday, June 24).

Hotelling Lectures: This year's Hotelling Lectures feature Fuhito Kojima, Stanford University, who will present *"Matching with Constraints and Market Design,"* on Thursday, June 27, from 9:00 AM to 12:30 PM in Johnson Hall Room 102. This session is open to all conference attendees and we hope you plan to attend.

Evening Events: All conference attendees are invited to the **Welcome Dinner** on Thursday night in the HUB Ballroom (2nd floor) from 6:30 PM to 8:30 PM – reconnect with old friends and make some new ones at this casual dinner on campus. On Friday evening, all attendees are invited to attend the **Conference Reception**, generously hosted by Amazon. The reception is a short drive (transportation is provided) from campus to the Museum of History and Industry, located in trendy South Lake Union. Spend the evening at MOHAI on the shores of Lake Union, enjoying the waterfront views along with great food and remarks by Amazon's Senior Principal Economist, Dr. Stefan Hoderlein – a great way to enjoy a Friday night in Seattle.

Presenter Information: The parallel sessions are 90 minutes long, and each present will have 20 minutes (including questions/answers). Most sessions include 4 papers, but if your paper is in a session with 5 presentations, each presentation will still have 20 minutes (those parallel sessions will run 10 minutes over the published end time). Please bring your slides on a USB drive to be uploaded in the session room where you are scheduled to speak. PCs will be provided in each session room, with the most recent versions of PowerPoint and Adobe Acrobat Reader on the laptops. The **slide ratio is 16:9**. The conference schedule does not allow time during the sessions to switch laptops, therefore speakers may not use their own laptops and must use the equipment provided.

Session Rooms: Plenary talks and semi-plenary talks will be held in Kane Hall (specific room assignments will be posted on Conference Maker) and the parallel sessions will be in the Husky Union Building (HUB), Mary Gates Hall (MGH), Johnson Hall (JHN), and Nano Sciences (NAN). All session room locations will be uploaded to Conference Maker by Monday, June 24.
