Office: 339 Savery Hall
Office Hours: M/W 10-11am

Course Description:
This course is designed to introduce students to the subject of international economic development, with a focus on population issues. Since I am an economist, we will be focusing on the topics and tools of economics, and the body of knowledge so far, as created by economists. Topics include demography, poverty and income inequality, fertility choice, sex selection, marriage choice and the role of women, parental investments in child health and education, including discrimination against girls, and migration and urbanization.

The goals of the course are as follows: 1) Students should be able to identify and discuss the issues surrounding the topics listed above; 2) Students should be able to analyze economic models relevant to these issues; and 3) Students should be able to comment on magazine articles and review articles in economic journals dealing with population and development, explaining and expanding upon the economic analysis they contain.

Course Organization:
This course will combine lecturing on traditional microeconomic theory with in-depth discussion of real-world issues. Occasionally, we will break into groups to examine, and form a deeper understanding of, the material. Students are expected to be familiar with the course readings at every meeting and to provide comments and questions relevant to the topic. This is not an easy course in terms of the reading and writing required. Please be prepared to spend a lot of time reading, and writing about, difficult material.

Text:
There is no text for this topic. Lectures will be based on textbook excerpts, journal and magazine articles, and my own knowledge of the subject. All readings will be available in Canvas, either as pdfs or through direct links accessible by UW computers.
Prerequisites:
The explicit prerequisite for this course is a grade of 2.0 or higher in Econ 300. However, we will be reading papers from economic journals, and while we will be reviewing the concepts of regression analysis and interpretation, some familiarity with data analysis is strongly recommended. Please discuss your background with me if you are not sure about your preparation.

Evaluation:
You will be graded on 4 problem sets, 3 quizzes, and a 15-20 page paper on a topic that is related to the class. You may work with one other person on the paper, but 2 person papers should be 19-20 pages long. There is no final exam. You will get W credit if you complete all assignments and pass the class with a 2.0 or above. Class grades will be calculated as follows:

Problem sets (4) – 20%
Quizzes (3) – 40%
Paper (includes workshopping and peer review for full credit) – 40%
I expect the class median to be approximately 3.3 and will curve final grades as needed.

Problem Sets:
It’s nearly impossible to learn the tools of economics without working problems. I will assign biweekly problem sets, beginning the first week of class. They will always be due Thursday of the week after they are assigned. You may work with other students, but please submit your own work. I will randomly select two problems to grade from each assignment. The first assignment will be due Thursday, April 18.

Quizzes
Quizzes will be based on the readings, lectures, and problem sets, and will last approximately 45 minutes. I do not expect them to be overly difficult for anyone who has engaged with these three elements of the class. The first quiz will be given on Thursday, April 18.

Paper
We will discuss the paper in depth in the second week of classes. You may work with one other person on the paper and only turn in one paper per team. We will work together as a class to brainstorm ideas for our papers around midterm time, and toward the end of the quarter you will be expected to submit your paper for peer review. Unfortunately, due to the limitations of canvas, this will not be anonymous. Please speak to me if you have any concerns. The paper will be due during final exam week and will be checked by the university’s anti-plagiarism software.
**Late/Absence Policy:**
There will be no make-up quizzes given or late problem sets accepted, but problem sets can be turned in any time before 5pm the day they are due. Papers can be submitted late with a 5% grade penalty for every day late after the due date.

**Course Outline:**
We will follow the general outline below. Please consult the class website before every class to obtain reading assignments and check for any class announcements.

1. **Introduction & Methodology (Week 1-2)**
   a. What is economic development?
   b. Introduction to population
   c. Population growth and development
   d. Poverty
   e. Empirical tools
2. **Fertility (Week 3-4)**
   a. Development and fertility
   b. Contraception & sex selection
3. **Family Formation (Weeks 4-6)**
   a. The economics of marriage
   b. Intra-household decision-making
4. **Mortality and Health (Week 6)**
   a. The decline of mortality
   b. Hunger, health and productivity
5. **Investing in Children (Week 7-8)**
   a. Parents and child health
   b. Child health, schooling, and future outcomes
   c. Child labor
6. **Migration & Urbanization (Week 9-10)**
   a. Agricultural surplus and urban migration
   b. International migration
University of Washington
Department of Economics
Examination rules

1. Material allowed during a closed book exam:
   i. All books, papers, notebooks etc. must be placed inside your bag (backpack etc.) and the bag must be securely and fully closed. If you do not have a bag, you must place all your material out of your reach (classroom window sill etc.)
   ii. Only keep writing tools and basic calculators (i.e. simple 4-functions calculators). Graphing calculators or calculators with memories will not be allowed. Sharing of calculators is not permitted.
   iii. Cellular phones must be turned off before entering the class and placed in your closed bag (not in your pocket). You are not allowed to use a cellular phone during an exam. Doing so will result in the termination of your exam time (your exam being taken from you at this point). Likewise i-pads or i-pods (or similar devices) are not allowed. The use of personal computers is not allowed during an exam.
   iv. Baseball caps with visors and any kinds of headgear hiding your eyes are not permitted.

2. Attendance and special accommodation:
   i. You are expected not to leave the room during the exam except in case of emergency. This includes restroom use; be sure to use the restroom before the beginning of the exam. If you must leave the room, you will be asked to leave your phone with the instructor while you are gone.
   ii. If you arrive late to an exam, you cannot expect to get extra time after the official end of the exam to make up for the missing time at the beginning.
   iii. If you have a documented disability, please show your instructor your documentation from the Office of Disability Resources for Students on the first day of class, so that your instructor can make all the necessary arrangements if you wish to take your exam in a separate place.

3. Academic honesty: Academic integrity is the cornerstone of the Department’s rules for student conduct and evaluation of student learning. Students accused of academic misconduct will be referred directly to the Office of Community Standards and Student Conduct for disciplinary action pursuant to the Student Conduct Code and, if found guilty, will be subject to sanctions. Sanctions range from a disciplinary warning, to academic probation, to immediate dismissal for the Department and the University, depending on the seriousness of the misconduct. Dismissal can be, and has been, applied even for first offenses. Moreover, a grade of zero can be assigned by the instructor for the course.
   i. Exams are individual work and cheating will not be tolerated. Cheating includes, but is not limited to, bringing notes to a closed-note exam, consulting a classmate or any other source of information during an exam, or looking at a neighbor’s paper. See here for a more exhaustive list: http://www.washington.edu/uaa/advising/help/academichonesty.php
   ii. My policy is to give a zero for an exam that I believe you have cheated on. This usually results in a failing grade for the course.
