Website: Catalyst course **'ECON 300 B Spring 2016'**

Course Objectives:

Whether it is explaining the behavior of consumers, producers or government agencies, microeconomics lies at the heart of decision-making. This course will provide students with a thorough grounding in Intermediate Microeconomics. The course will blend theory and practical relevance and focus on a range of applications in markets, consumer and producer behavior. The course will further focus on decision making under asymmetric information and game theory.

The course is aimed at students who have studied Econ 200: Introduction to Microeconomics at the university or equivalent and will be delivered at an intermediate level. Mathematical notation, basic algebra and calculus is involved. Please get in touch with me if you are unsure about the mathematical content.

Textbook:

Hal Varian's *Intermediate Microeconomics with Calculus: A Modern Approach*
