

Economics of Gender (Econ 447/GWSS 447)

Professor Rachel Heath

Spring 2023

Tuesday and Thursday; 3:30-5:20 pm; Thompson 119

Contact information

Email: rmheath@uw.edu

Office hours: Tuesday, 1:30-3:15 and by appointment.

Office location: Savery 335

Textbook: Mukesh Eswaran, *Why Gender Matters in Economics*. Princeton University Press, 2014.

Prerequisites: At least a 2.0 in Intermediate Microeconomics and Macroeconomics (Econ 300 and 301).

Grading rubric

30 percent	Midterm 1
30 percent	Midterm 2
30 percent	Final paper
10 percent	Participation class discussions and activities

Class format: Class will meet in person.

Information on Final Project: The final project for the class is a 6 to 8 page double-spaced paper (not including graphs and charts) on an important *policy question* related to gender and the economy. The final draft of the paper is due on the date of the final exam.

Some suggestions for topics will be posted on the course webpage, but you are encouraged to work on another topic if you have a specific interest. You should make sure to frame it as a policy question, though. For instance, if you are interested in, say, gender differences in the tendency to bargain, your paper should not just be “gender differences in the tendency to bargain”. Instead, you should focus on a question policymakers are asking (or at least, might be asking at some future time), such as what policies can close gender gaps in salaries due to a differential tendency to negotiate. I will post

The overall outline of the paper is below:

- (i) **Introduction**
Define the issue and explain why it is important.
- (ii) **Economic Analysis:**
How can economic tools be applied to analyze the issue? What existing evidence do we have? (This should be the longest section of the paper. While you can reference the popular

press, blog postings, policy briefs, etc. you should also include citations to relevant papers in the economics literature. – e.g. American Economic Review, Quarterly Journal of Economics, etc. You can cite the papers on the class syllabus, but you should make sure to supplement them with additional papers as well. You can apply the economic models you have learned in other classes to the issue if you find it helpful, although this is certainly not required.)

(iii) **Conclusion**

What lessons can we learn from the economics analysis? (i.e. what are the policy recommendations or what are the new insights for the business world or the academic world etc.).

(iv) **References**

No specific format (e.g. MLA, APA) is required, but just make sure to cite your references

To help spread the work over the course of the quarter and provide you opportunity to seek advice and feedback, the final project will be due in stages. For each stage, look for a link under “Assignments” on Canvas.

Thursday, April 20	Proposed topic and at least five potential sources from economics literature
Tuesday, May 2	Outline
Tuesday, May 23	Rough draft
Thursday, June 8	Final draft

Writing credit. You can get writing credit for the class if you participate in a peer feedback exercise and meet with me at least once in office hours to discuss your paper. I’ll circulate a sign-up sheet in mid May to match you with a partner for the peer feedback exercise.

Grading policies

- Do not cheat or plagiarize. Anyone caught cheating runs the risk of failing the class, and/or being reported to the dean. Here is the official department policy on cheating:
Academic integrity is the cornerstone of the Department's rules for student conduct and evaluation of student learning. Students accused of academic misconduct will be referred directly to the Office of Community Standards and Student Conduct for disciplinary action pursuant to the Student Conduct Code and, if found guilty, will be subject to sanctions. Sanctions range from a disciplinary warning, to academic probation, to immediate dismissal for the Department and the University, depending on the seriousness of the misconduct. Dismissal can be, and has been, applied even for first offenses. Moreover, a grade of zero can be assigned by the instructor for the course.
- Plagiarism includes the use of any writing that is not your own without citation, including work generate by artificial intelligence such as Chat-GPT.
- If you would like to challenge a grade, you need to write a memo explaining which questions you believe have been unfairly graded, and providing justification for why you think your answer deserves more points than it has received. Email me this memo. I will then regrade your exam, in light of the material you have provided. Since I will regrade your whole exam, your grade could either go up or down.

Schedule

- Changes may be announced over email (so please check your official UW email regularly)
- I will plan to post the slides before class for those who like to take notes on the slides themselves (and/or who might want to refer forward or back to other slides during class). If I make any changes between then and the class -- or notice corrections that need to be made during class -- I'll always post an updated version after class.

Date	Topics	Reading(s)
